

# Add Free Gift To Cart Price Rule

---

\*\*\*\* designed for Magento enterprise edition 1.13 \*\*\*\*

\*\*\*\* has not been tested on magento community \*\*\*\*

## Installation Instructions:

- 1.) Unzip the module file and copy the app and skin directories into your site's public folder.
- 2.) Flush the cache storage.
- 3.) Navigate to the home page
- 4.) Manually delete the /var/cache folder
  - a. The quote item attribute for a free product will not save unless this directory is deleted.

## Purpose:

This module enables a user to add a discount that will add a free product to the cart.

## Important Notes:

- If more than one shopping cart price rule offering a free product is valid, only the first rule is applied. More than one free product rule cannot be applied to an order.
- When a free gift rule is created, the Magento 'Discount Amount' feature is disabled for that rule. No matter what the user types into the 'Discount Amount' field, this will not influence the discount in any way. The Free Gift discount will always be 100% of the product's price.

### Update prices using the following information

Apply

Percent of product price discount

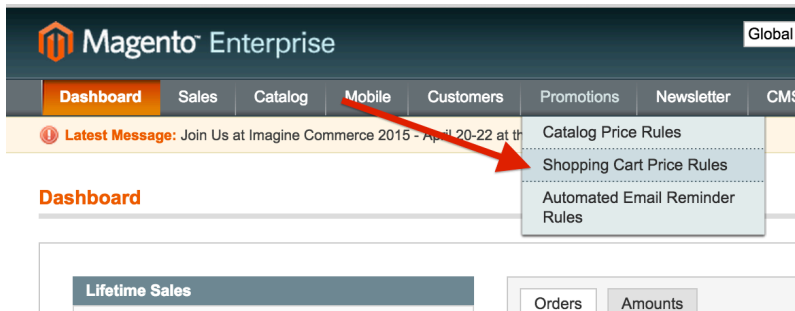

Discount Amount \*

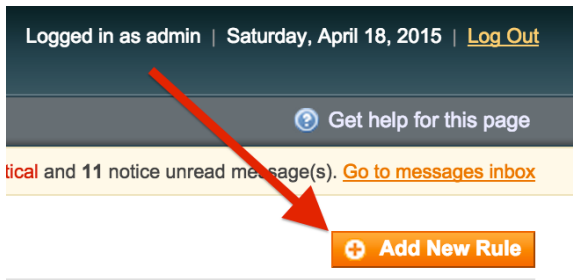

0

## Instructions:

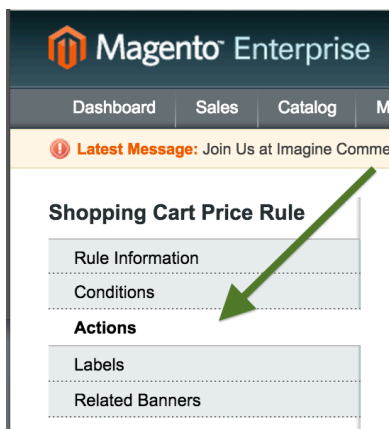

- In the Magento admin, hover over the 'Promotions' menu. In the drop down list that appears, left click on 'Shopping Cart Price rules'. (see picture below)

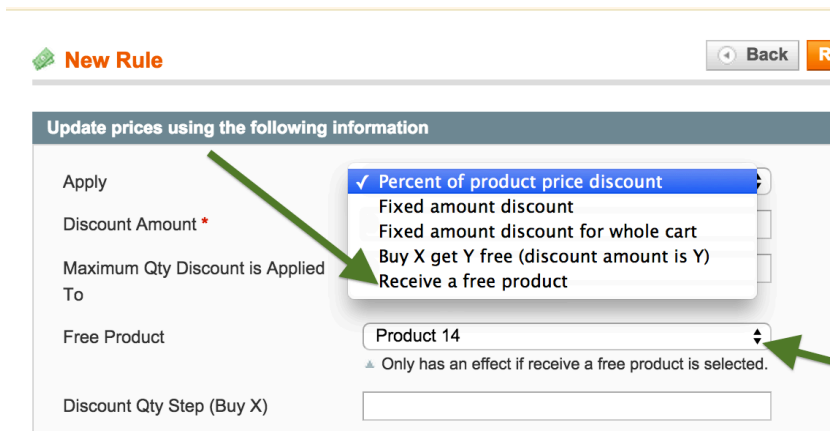

- Left click on 'Add New Rule' in the upper right part of the screen.

- Next, left click on the 'Actions' Tab.

Next, go to the 'Apply' drop down menu and select 'Receive a free product'. And, Then, go to the 'Free Product' drop down menu and choose a free product.

- Now, complete the other fields you need to fill in to successfully create a shopping cart price rule. Then, save the shopping cart price rule.

**You have successfully created a free gift rule! Whenever the conditions you specified are met, a free gift will now be added to the cart.**
